

RO-IR SRD-12

TECHNICAL REGULATION

for the radio interface

concerning PMR446 devices

(previous coding RO-IR 15)

1. Basic Considerations

Directive 2014/53/EU of the European Parliament and of the Council of 16 April 2014 on the harmonization of the laws of the Member States relating to the making available on the market of radio equipment and repealing Directive 1999/5/EC was implemented in national legislation by Government Decision No. 740/2016 on making available on the market of radio equipment with subsequent amendments and completions.

This technical regulation contains the requirements for license-exempt use of radio spectrum by the devices that are intended for private mobile radio communications in the 446 – 446.2 MHz (PMR 446 devices) frequency band and considers compliance, especially, with the provisions of Article 3 Paragraph 2 and Articles 6-8 of Directive 2014/53/EU.

Nothing in this technical regulation shall preclude the obligation for radio equipment placed on the market or made available on the market in Romania to comply with Directive 2014/53/EU.

The obligations arising from Directive (EU) 2015/1535 of the European Parliament and of the Council of 9 September 2015 laying down a procedure for the provision of information in the field of technical regulations and of rules on information society services are met in this regulation (OJ L 241, 17.9.2015, p. 1–15).

All the Romanian technical regulations for the radio interfaces notified under Directive (EU) 2015/1535 shall be published and shall be made available on National Authority for Management and Regulation in Communications (ANCOM) website at: <http://www.ancom.ro/reglementari-interfete> 2723.

2. Radio Interface Specifications

PMR 446 Devices

Frequency band	Annex
446 – 446.2 MHz	RO-IR SRD-12-01

For the purpose of this technical regulation, *a proximity radio device (short-range device - SRD)* means a radio device which provides either unidirectional or bidirectional communication, and which receives and/or transmits signals over a short distance and at low power. Devices that are intended for private mobile radio communications (PMR 446) are also part of short-range device category.

For the purpose of this technical regulation, PMR446 devices covers hand portable equipment (without base station or repeater use) carried on a person or manually operated, which uses integral antennas only in order to maximise sharing and minimise interference. PMR 446 equipment operates in short-range *peer-to-peer* mode and shall not be used as a part of infrastructure network nor as a repeater.

For the purpose of this technical regulation, *non-interference and non-protected* means that no harmful interference may be caused to any radio communication service and that no claim may be made for protection of these devices against interference originating from radio communication services.

The use of radio spectrum by the PMR 446 devices is permitted on a non-interference and non-protected basis provided that such equipment meets the conditions set out in the Annex.
